

Cloud Solution Architect (f/m/d)

We dare to trust - this is our employer promise in Generali Versicherung AG. We have the courage to take on challenges and are pioneers in many areas. That is why we are one of the most successful insurance companies in Austria and internationally. We also show courage as we give our employees a lot of autonomy - whether in terms of their possibilities for development or great flexibility in working hours and work location. This is because we trust our employees.

Vienna

Full-time employee

ab sofort

The international team is looking for “**Cloud Solution Architects**” with proficiency in defining, establishing, evolving, and executing governance controls and frameworks specifically for cloud computing environments across the globe, cloud platforms and cloud-based services and IT resources, in support of organizational and technological governance requirements.

What challenges can you expect?

- Design solutions aligned with the Group Cloud Framework and the Group Cloud Standard or by custom tailoring
- Integrate security by design into the developed solutions
- Act as the technical focal point, understand the business needs of specific requirements and develop best fitting solutions
- Identify gaps in the GOSP standard cloud services and, if necessary, find alternative solutions / temporary workarounds
- Support and promote further group-wide standardization and harmonization among the legal entities' cloud implementation efforts
- Support Customers in defining their cloud strategy (i.e. migration strategy, migration planning, cloud adoption models, etc.)
- In case of need, support the RFI/RFP process to identify third parties for specific cloud activities delivery
- Collection, evaluation, recording and monitoring of the Cloud initiatives as handed in by the Legal entities
- Execute and improve the Group Cloud monitoring and reporting processes
- Maintain and evolve the Cloud Group Standard in terms of technical, operational, security and infrastructure architecture
- Keep the cloud inventory updated for all the cloud initiatives
- Support other internal stakeholders (Procurement, Legal, Compliance, etc.) for any activity needed to provide the solution in alignment with the Group Cloud process

Which skills do we expect?

- At least 5 years of experience as Cloud Architect with governance skills, or as Governance control function with strong cloud skills
- Certified as Cloud Architect for one or more of the most relevant cloud providers (AWS, Azure, GCP) and wishing to continue a cloud learning path
- Knowledge of how to manage most common IaaS and PaaS services provided by AWS and Azure combined with ability to understand and sketch cloud architecture diagrams
- Proficient in Infrastructure as Code methodology with special reference to Terraform and GitLab CI/CD technologies
- Fluent in written and oral English: at least B2 certified level

What do we offer?

- We offer you the highest possible flexibility in working hours - we do not have fixed core hours
- We will provide you with a buddy at the beginning, so that you can quickly arrive at our company
- We have a great company restaurant
- Our location is very central: in the middle of Vienna's first district
- We invest in your training and further education - from specific seminars to professional talent management
- We also take care of your future: with our company pension scheme for our employees.
- We do not have all-in contracts: There is a lot to do, but overtime is paid out.
- We offer a flexible home office concept - so you are part of the office even when you are not in it
- We promote sustainable mobility: We cover 50% of the cost of your public transport ticket so that you can get to work in a sustainable and relaxed manner
